- State: FCT — Abuja

Flexible milestone payment plans available for
buyers entering at current construction stage.

Main Listing Description (copy into the description box)

Luxury 4-Bedroom Terrace Duplex for sale within an
exclusive 9-unit gated enclave on the Katamkpe

corridor, Abuja — directly fronting the newly completed 4-lane super highway with fast access to the Central Business District and Maitama.

Construction is actively underway and has progressed well past ground works: the first floor is fully structured, decking is complete, and second-floor columns are currently being erected to support the upper walls. This is real, visible construction — not a paper plan — and buyers are welcome to request site verification photos/video before committing.

Property Specifications:

- 4 Bedrooms, all en-suite
- Approx. 380 sqm built-up floor area upon completion
- Exclusive L-shaped enclave of 9 units total (5 units primary wing, 4 units adjoining wing)
- Gated estate with dedicated resident parking and paved internal access
- Direct frontage on Abuja's newly constructed 4-lane super highway

Why this is priced right: unfinished carcass/lintel-roofed units in this same Katamkpe corridor already trade at ₦200,000,000+ in the open market. This unit is priced against its ₦450,000,000 finished value, giving early buyers meaningful equity upside by entering during active construction rather than at handover.

Flexible milestone-based payment plans are available. Fractional/co-investment options are also

available for buyers interested in shared ownership
— ask for details.
