ZEROPAY — STRATEGIC TECHNOLOGY PARTNERSHIP PROPOSAL

To: Paystack Partnerships & Business Development Team

From: Tom Ugbodaga, Founder & CEO, BETONIQ(WEST) Limited

Email: zeropointfeild_nonwnt@zeropay.site Phone: +234 706 525 2117 CAC Registration: 56802 (Abuja, FCT, Nigeria) Date: July 23, 2026

SUBJECT: Strategic Technology Partnership — ZeroPay Offline NFC Protocol + Paystack MFB Settlement Infrastructure

Dear Paystack Partnerships Team,

I am writing to you not as a merchant seeking activation — but as the inventor of a technology that will bring Paystack into markets it currently cannot reach.

My name is Tom Ugbodaga. I am the Founder and CEO of BETONIQ(WEST) Limited (CAC No. 56802, Abuja), and the sole inventor of ZeroPay — the world's first offline-first, uncapped NFC contactless payment protocol.

THE GAP PAYSTACK CANNOT CURRENTLY FILL

Paystack is Nigeria's most trusted payment infrastructure company. Your acquisition of Ladder Microfinance Bank in January 2026 signals that you are expanding beyond payments into the full financial services stack — deposits, lending, and Banking-as-a-Service.

But there is one gap that neither Paystack's current API nor Paystack MFB can currently address:

The 38 million Nigerians who operate in environments with zero internet connectivity.

In Abuja's Games Village, Wuse Market, Garki, and across 200,000 informal market stalls in Nigeria — merchants cannot use your QR codes. They cannot use your payment links. They cannot use any POS terminal when the network drops — which in Nigeria's informal markets happens multiple times every day.

These 38 million Nigerians are not a small segment. They represent **■**847 billion in annual transaction value that is currently moving entirely in cash — invisible to Paystack, invisible to your MFB, invisible to the Nigerian financial system.

WHAT ZEROPAY DOES

ZeroPay is a patent-pending offline-first NFC contactless payment protocol. It enables merchants to accept digital payments with zero internet connectivity using a four-layer cryptographic architecture:

Layer 1 — NFC Communication: ISO 14443-A/B contactless protocol Layer 2 — Device Authentication: Physical Unclonable Function (PUF) — silicon fingerprint burned into the chip at manufacturing. Cannot be cloned. Cannot be spoofed — not even by the most advanced AI. Layer 3 — Transaction Signing: ECC P-256 cryptographic signature — offline, no server required Layer 4 — Distance Bounding: Nanosecond signal timing — prevents relay attacks and man-in-the-middle fraud

The signed transaction token is queued offline. When connectivity is restored, the Offline Batch Sync Engine transmits the verified, cryptographically signed batch directly to the Paystack settlement API. No transaction is lost. No fraud is possible.

The innovation is patent-pending. ZeroPay is the first payment system in the world to remove the offline NFC transaction cap entirely — Visa and Mastercard enforce £100/\$200 limits because they cannot authenticate offline. ZeroPay eliminates that limit permanently.

THE PARTNERSHIP OPPORTUNITY FOR PAYSTACK

ZeroPay is PSP-agnostic at the protocol layer. But we are choosing Paystack as our exclusive Nigeria Year 1 settlement rail. This is a deliberate strategic decision — not a default.

Here is what this partnership means for Paystack specifically:

1. VOLUME AT SCALE

ZeroPay's first-phase Abuja merchant rollout targets 200 merchants in Q4 2026. Each ZeroPay terminal generates a settlement batch to Paystack on every sync. 200 merchants transacting at an average of ■15,000/day = ■3,000,000/day flowing through Paystack settlement. At national scale (2,000 merchants by end of 2027) = ■30,000,000/day in new Paystack settlement volume. Volume you currently receive zero of — because these merchants are cash-only.

2. PAYSTACK MFB FLOAT HOLDING

ZeroPay terminal operators require a licensed deposit holder for customer float balances. Paystack MFB is the natural home for this. The partnership unlocks the MFB relationship — ZeroPay merchant float held at Paystack MFB, generating deposit income and cross-sell opportunities for your lending products.

3. EXCLUSIVE SETTLEMENT RAIL STATUS — YEAR 1

In exchange for co-branding, preferential API settlement fees, and priority technical support, BETONIQ(WEST) commits to Paystack as the exclusive Nigerian settlement rail for all ZeroPay transactions for the first 12 months of commercial operation.

4. BRAND POSITIONING — AFRICA'S FIRST OFFLINE FINTECH PARTNERSHIP

Paystack + ZeroPay = the first payment infrastructure in Africa specifically designed for zero-connectivity environments. This story writes itself for international press, investor decks, and CBN regulatory engagement. Paystack becomes the company that cracked the offline payment problem for Africa.

WHAT WE ARE REQUESTING

1. A formal Technology Partnership Agreement — ZeroPay as an authorised technology partner, not a standard merchant. 2. Preferential API settlement fee rate for ZeroPay batch settlement (volume-based, to be negotiated). 3. Priority technical support and dedicated API access during the Abuja merchant pilot phase. 4. Introduction to Paystack MFB's business development team for the merchant float deposit relationship. 5. Co-branding rights on ZeroPay terminals deployed in Nigeria for Year 1 of commercial operation.

In return, BETONIQ(WEST) commits to: - Paystack as exclusive Nigerian settlement rail — Year 1 - Minimum 200 merchant terminal deployments by Q1 2027 - Joint press release upon partnership execution - CBN PSSP application with Paystack listed as primary settlement partner

CREDENTIALS

Tom Ugboaga MSc NFC for Contactless Technology in Financial Transactions — University of Gloucestershire, England, 2011 (Top Graduate, Best Result in Cohort) MSc Computer Security Systems BSc Physics (Nigeria) ZeroPay is the direct commercialisation of 15 years of research and development. BETONIQ(WEST) Limited — CAC No. 56802, Abuja, FCT, Nigeria Paystack Merchant Agreement signed: July 14, 2026

NEXT STEP

I am requesting a 30-minute introductory call with your partnerships team this week. I can present the live ZeroPay offline transaction demonstration and the full technical architecture at that meeting.

Please contact me directly: Email: zeropointfeild_nonwnt@zeropay.site Phone: +234 706 525 2117

The informal economy of Nigeria has been waiting 20 years for this technology. Paystack is uniquely positioned to be the settlement infrastructure that makes it real.

I look forward to hearing from you.

Warm regards,

Tom Ugboaga Founder & CEO BETONIQ(WEST) Limited | ZeroPay CAC Registration No. 56802 Abuja, FCT, Nigeria zeropointfeild_nonwnt@zeropay.site +234 706 525 2117
