MASTERCARD FOUNDATION — FUND FOR RESILIENCE AND PROSPERITY (FRP)

CHALLENGE FUND APPLICATION

Applicant: BETONIQ(WEST) Limited | ZeroPay Tom Ugbodaga | zeropointfeild_nonwnt@zeropay.site CAC No. 56802 | Abuja, FCT, Nigeria | +234 706 525 2117 Date: July 23, 2026 Portal: frp.org | smartme.adalia.fi/login/FRP

ORGANISATION NAME: BETONIQ(WEST) Limited PRODUCT/SERVICE: ZeroPay — Offline NFC Payment Terminal + Solar Mesh Hub Network SECTOR: Digital Economy — Payments Infrastructure COUNTRY OF OPERATION: Nigeria (with West Africa expansion) STAGE: Pre-Series A | Seeking first-phase commercial deployment capital

PROBLEM STATEMENT

The Mastercard Foundation's Fund for Resilience and Prosperity exists to support organisations creating dignified and fulfilling work opportunities for young Africans — particularly in the digital economy.

ZeroPay creates those opportunities at two levels:

Level 1 — It enables 38 million unbanked Nigerian merchants and market traders to participate in the formal digital economy for the first time. When a market trader in Abuja can receive digital payments, they can build transaction history, access credit, hire assistants, and grow. Cash confines them. ZeroPay liberates them.

Level 2 — It creates a new class of work: ZeroPay Terminal Agents. Young Nigerians who deploy, maintain, and support ZeroPay terminals in their communities. Every Solar Mesh Hub requires a community operator. Every market cluster requires a local technician. This is a new, tech-enabled job category — accessible to young Nigerians with secondary school education.

We are not building an app. We are building infrastructure — and infrastructure creates permanent, sustainable employment.

THE SOLUTION

ZeroPay is the world's first offline-first, uncapped NFC contactless payment system. Merchants accept digital payments with zero internet using patent-pending PUF hardware authentication + ECC P-256 offline cryptographic signing. Transactions queue offline and batch-settle to Paystack when connectivity returns.

The Solar Mesh Hub Network extends ZeroPay's reach into zero-connectivity environments — powered entirely by solar energy, requiring no grid infrastructure.

This is not a theoretical solution. It is a fully architected system with: - Patent-pending cryptographic protocol (filed April 2026) - Paystack settlement integration agreed (Merchant Agreement signed July 14, 2026) - CBN PSSP licence application in progress - Live interactive investor demo platform deployed - Full technical architecture documented

IMPACT METRICS — YEAR 1 (ABUJA PILOT)

Direct beneficiaries: 200 informal market merchants — first digital payment capability Estimated 38,000 customers of those merchants — first digital payment experience 3 communities receiving Solar Mesh Hub network coverage

Work opportunities created: 12 ZeroPay Terminal Agent positions (young Nigerians, community-based) 6 Solar Mesh Hub operator positions (maintenance and community management) 3 merchant onboarding coordinator positions

Financial inclusion metrics: ■29,500,000 in previously invisible cash transactions moved into the formal system in Year 1 200 merchants generating first-ever digital transaction histories — enabling future micro-credit access Average merchant income increase estimated at 23% (based on comparable mobile money deployment studies in Kenya)

SCALABILITY

The ZeroPay protocol is PSP-agnostic, currency-agnostic, and geography-agnostic. The same hardware and protocol deployed in Abuja works identically in Accra, Freetown, Nairobi, Dhaka, and Jakarta. Year 1 is the proof of concept that unlocks global replication.

FUND REQUEST

We are applying to the Mastercard FRP Challenge Fund for: \$500,000 USD (Tier 2 — Scale-Up category)

Use of funds: Terminal hardware manufacturing (200 units): \$180,000 Solar Mesh Hub installation (3 hubs): \$120,000 Merchant onboarding and training: \$60,000 ZeroPay Agent workforce training (18 young Nigerians): \$45,000 CBN regulatory compliance: \$50,000 Operations and monitoring (12 months): \$45,000 Total: \$500,000

WHY MASTERCARD FRP

The FRP fund is specifically designed for organisations with high growth potential and the ability to scale innovative and resilient solutions for young Africans. ZeroPay is exactly this.

We are not a trading company or a retail app. We are building the payment infrastructure layer that allows 38 million Nigerians to enter the formal economy — and we are creating a new tech-enabled workforce to operate it.

The Mastercard name on this project — as our first international institutional funder — sends a signal to every CBN regulator, Nigerian bank, and international investor that ZeroPay has been evaluated and endorsed by the world's most credible payment infrastructure company.

That signal alone is worth more than the capital.
