

THE 77 GOLF & COUNTRY ESTATE — INVESTMENT TEASER

Bwari, Abuja, Nigeria — Federal Capital Territory | BETONIQ WEST LTD | September 2026

STRICTLY PRIVATE & CONFIDENTIAL 3-PAGE TEASER — FULL DATA UNDER NDA

"Live on the Greens, Work in Comfort, Heal in Serenity and Relax in Luxury."

Nigeria's capital region has no genuine golf-anchored luxury community. The 77 Golf & Country Estate is a 77-hectare, mixed-use development in Bwari, Abuja — a real 18-hole golf course, 100 luxury 4-bedroom duplexes, a boutique hotel, a shopping village, a private hospital and an international school, inside one gated, fully secured community. It is positioned to capture unmet demand from Nigerian HNWIs, senior executives and the global Nigerian diaspora for a lifestyle-led address comparable to golf estates they already know from the UK, US, UAE and South Africa.

THE FOUR PILLARS

WHY NOW

- Abuja's persistent housing deficit at the upper end of the market — large-format, secure, amenity-rich residences remain scarce.
- Genuine golf-anchored estates are almost nonexistent in Nigeria, limiting direct like-for-like competition.
- Growing diaspora and senior-executive demand for a lifestyle-led, gated community within reach of the capital.
- Bwari's expanding road network and greater land availability versus the congested FCT core make this the natural site for a large-format estate.

THE OPPORTUNITY & THE TEAM

A dual-track capital raise, phased to minimize upfront risk — backed by institutional-grade leadership.

HOW CAPITAL CAN PARTICIPATE

- **Direct plot & duplex sales** — the primary entry point, priced ahead of the value uplift that comes once the golf course, clubhouse and hotel are visibly under construction.
- **Structured investment / partnership route** — equity or profit-share in the Phase 2/3 income-producing assets (hotel, shopping village, hospital, school), for institutional or larger-ticket investors seeking recurring income exposure rather than a single unit.
- This dual-track approach means the ₦50B Phase 1 target does not depend on any single investor class — broad retail buyer demand and larger strategic capital can both participate.

Phased, Self-Funding Development Timeline

LEADERSHIP

Air Vice Marshal Monday Riku Morgan (Rtd) — Founder & Executive Vice Chairman, BETONIQ WEST LTD. His military and institutional pedigree provides board-level authority and credibility for the estate's investor and partnership engagements.

Tom Ugbo-daga — Shareholder & CEO, BETONIQ WEST LTD; Managing Director for this project, overseeing day-to-day execution, investor engagement and delivery. MSc Computer Systems Security, University of Gloucestershire, England (2011).

What's held back for now: the full 27-page business plan — including the detailed cost buffer, stress-tested ROI scenarios, land title framework, and site masterplan — is shared only after a signed Non-Disclosure & Non-Circumvention Agreement, to protect the project's commercial position ahead of financial close.

THE ASK & NEXT STEP

A scarce, high-demand asset with a capital structure designed to protect downside.

WHAT WE'RE SEEKING

A strategic capital partner for direct investment or a structured profit-share position in the estate's Phase 2/3 income-producing assets (hotel, shopping village, hospital, international school) — ticket size flexible and to be discussed post-NDA. Because the core residential land-sale program is designed to clear its return target on its own, the sponsor retains full flexibility on the timing and structure of any partner's entry and exit.

LONG-TERM VALUE CREATION

- Retained or leased income from the hotel, shopping village, hospital and school once operational — directly or via an operating partner.
- Capital appreciation on any plots or units retained as the estate matures and its amenities come online.
- Potential partial or full institutional sale of stabilized, income-generating assets once mature, without needing to sell to meet the project's core return target.

NEXT STEP

Sign our standard Non-Disclosure & Non-Circumvention Agreement to receive the full 27-page Business Plan & Investment Case — including the detailed financial model, stress-tested return scenarios, site masterplan and land title status. Subject to title perfection, detailed costing and phased pre-sales execution, this project is ready for the next stage of due diligence.
