

BETONIQ WEST LTD

Investment Application | brand: ZerôPay Money

Payments work without the internet. Finally.

The Problem

1.4 billion unbanked globally / 38 million in Nigeria alone. In rural and semi-urban Nigeria, merchants and agents lose sales daily when network connectivity drops — POS terminals go dead the moment they lose signal.

The Solution

ZerôPay Money is a hardware-rooted, offline-first payments protocol layer sitting below the PSP/settlement rail. Our PUF/ECC-secured terminals generate cryptographically signed offline tokens (72-hour TTL) that sync automatically once connectivity returns via our Solar Mesh Hub relay network. Patent-pending technology (filed April 2026).

Traction

- Signed Paystack merchant agreement (July 2026)
- Live product demos and investor portal deployed
- Actively building agent/merchant network across underserved Nigerian corridors

The Ask

Raising \$100,000+ in pre-seed funding to scale terminal deployment, complete regulatory licensing (PSSP/PTSP/Super-Agent), and expand our field agent network.

Team

Tom Ugboaga — Shareholder & CEO
